PROFESSIONAL SUMMARY

Versatile **Full-Stack & Solutions Developer** and **IT Systems Officer** with 8+ years of cross-industry engineering experience spanning public-sector GovTech standards, enterprise RFID / WMS logistics architecture, and modern web & native mobile applications. Proven track record leading software departments, delivering 10+ national-scale tender initiatives, architecting resilient **n8n AI workflow pipelines**, and developing scalable applications using **Next.js 16, TypeScript, React 19, Kotlin, and Android Native**. Adept at bridging technical implementation with high-level stakeholder management.

CORE TECHNICAL COMPETENCIES

Full-Stack & Web	TypeScript, Next.js 16 (App Router), React 19, Tailwind CSS v4, Node.js, Prisma ORM, RESTful APIs, SSR/SSG
Mobile & Embedded	Android Native (Kotlin & Java), MVVM & Repository Pattern, Room DB (SQLite), RFID (HF/UHF SDKs), Barcode Scanners, NFC
Automation & AI	n8n (Self-Hosted & Cloud), AI Agent Workflows, Multi-Service Webhooks, REST API Pipelines, Python Automation
Databases & DevOps	PostgreSQL, MySQL, Redis Caching, Docker, Linux VPS, Git / GitHub, CDN & Performance Optimization
Systems & Leadership	GovTech IT Systems Governance, IT Project Management (Agile/Scrum, Jira), WMS Architecture, Technical SOPs & Tender Bids

PROFESSIONAL EXPERIENCE

Penata Kelola Sistem dan Teknologi Informasi (IT Systems Officer) • Kementerian Ketenagakerjaan May 2025 – Present
Republik Indonesia (Kemnaker)

South Jakarta, Indonesia • Directorate of Binapenta & PKK

- Direct internal information systems governance supporting strategic national employment expansion initiatives across directorate work units.
- Pioneer process digitalization and workflow automation pipelines utilizing **n8n** and REST APIs to eliminate inter-directorate communication bottlenecks.
- Author enterprise technical documentation, digital system SOPs, and governance frameworks ensuring operational data integrity and public-sector cybersecurity compliance.
- Spearhead cross-platform data mapping, automated report aggregation, and real-time synchronization feeds with central government databases.

Remote Project Manager (Freelance / Contract) • PT Wahana Datarindo Sempurna

June 2025 – Nov 2025

South Jakarta, Indonesia (Remote)

- Directed end-to-end execution of enterprise Warehouse Management Systems (WMS) and RFID-based software infrastructure.
- Served as chief technical liaison aligning corporate stakeholders, distributed software engineering squads, and international hardware vendors.
- Orchestrated sprint cadence and deliverable tracking via Agile/Scrum methodologies using Jira and Trello, achieving 100% milestone on-time delivery.

Head of Software Department • PT Wahana Datarindo Sempurna

June 2023 – June 2025

South Jakarta, Indonesia

- Led the software engineering department overseeing product discovery, presales architecture, Proof-of-Concept (PoC) builds, and post-deployment SLAs.
- Successfully led technical architecture and administrative proposals for **10+ national-scale enterprise tenders** in RFID asset tracking and logistics.
- Engineered full lifecycle hardware-software integration bridging industrial RFID readers (HF/UHF) with backend databases and custom client software.

Android Developer • PT Wahana Datarindo Sempurna

July 2022 – June 2023

South Jakarta, Indonesia

- Developed native Android WMS applications integrated with RFID HF/UHF and handheld laser barcode scanners via vendor SDKs.
- Implemented resilient offline-first architecture with local **Room Database (SQLite)** and background sync via RESTful APIs.
- Architected codebase adhering to MVVM and Repository patterns, reducing crash rates and streamlining on-site warehouse deployments.

Android Developer • PT Satria Antaran Prima Tbk. (SAP Express)

Jan 2022 – June 2022

DKI Jakarta, Indonesia

- Engineered mission-critical native Android applications for Digital Wallet, real-time Package Tracking, and courier logistics operations.
- Implemented hardened security mechanisms, session tokens, and cryptographic verification for financial digital wallet transactions.
- Integrated courier devices with central payment gateways and dispatch management APIs across nationwide hubs.

Full-Stack & Web Developer • PT Spekta Cipta Interusa

March 2020 – Oct 2021

Belitung / Remote, Indonesia

- Engineered custom web platforms, deploying CDN edge caching, and fine-tuning server load times for sub-second latency.
- Implemented secure user authentication, role-based access control (RBAC), and automated disaster recovery backup pipelines.

IT Support & Network Technician (Internship) • Kantor Camat Tanjung Pandan

July 2015 – Sept 2015

Belitung, Bangka Belitung, Indonesia

- Designed and deployed local area network (LAN & Wi-Fi) infrastructure across office work units, establishing stable internet connectivity for sub-district government operations.
- Installed and configured network hardware including routers, access points, network switches, UTP cabling (crimping RJ45), and local IP distribution.
- Provided front-line technical support, hardware troubleshooting (PCs, laptops, printers), and operating system maintenance for government personnel.

KEY FEATURED ENGINEERING PROJECTS

GovTech Process Digitization & n8n Data Pipeline • Workflow Automation & AI PostgreSQL • n8n • REST APIs • Python

Built automated workflow pipelines eliminating administrative tracking lag across government employment expansion programs. Integrated automated data validation, inter-departmental notification feeds, and multi-directorate reporting.

Enterprise WMS & RFID Asset Tracking Solution • Systems & Mobile Android Kotlin • RFID HF/UHF • Room DB • MVVM

Constructed an end-to-end WMS client application deployed across 10+ major national logistics tenders. Features real-time handheld UHF tag scanning, offline-first caching, and high-throughput server synchronization.

Cloud Operations & High-Throughput Platform • Full-Stack Web Next.js 16 • TypeScript • React 19 • Prisma • PostgreSQL

Designed a high-throughput management platform utilizing Next.js 16 App Router, Prisma ORM, and Tailwind CSS. Implemented edge caching, server actions, and type-safe database schemas with sub-second response times.

EDUCATION

Bachelor of Informatics Engineering (S.Kom)

STMIK Nusa Mandiri, Jakarta

2017 – 2019

Associate of Computer Engineering (A.Md.Kom)

Universitas Bina Sarana Informatika (BSI), Jakarta

2013 – 2016

PROFESSIONAL CERTIFICATIONS (43+ VERIFIED)

- **Deploy Multi-Agent Architectures & ADK** — Google (2026)
- **DIGDAYA Practitioner Phase** — LPPI (2026)
- **Fundamental Deep Learning & Gen AI** — Dicoding (2026)
- **Cloud Practitioner Essentials (AWS)** — AWS / Dicoding
- **Oracle Java Programming** — Oracle Academy
- **Internet of Things (IoT)** — Digital Talent Scholarship
- + 37 additional verified credentials in AI, Cloud, Mobile & Systems (viewable on web portfolio).
