PROFESSIONAL SUMMARY

High-impact **Full-Stack & Solutions Developer** with 8+ years of engineering experience architecting scalable web applications, distributed APIs, and resilient data systems. Proficient in **TypeScript, Next.js 16 (App Router), React 19, Node.js, Prisma ORM, and PostgreSQL**, with a proven record of building high-throughput cloud platforms and optimizing query latencies to sub-second benchmarks. Experienced in bridging full-stack systems with **AI-powered development tools, workflow automations (n8n)**, and native mobile clients. Recognized for autonomous technical leadership and end-to-end product delivery in fast-paced environments.

CORE TECHNICAL COMPETENCIES

Full-Stack & Web	TypeScript, JavaScript (ESNext), Next.js 16 (App Router), React 19, PHP (Laravel / CodeIgniter), Tailwind CSS v4, Node.js, Express, RESTful APIs, Server Actions, SSR/SSG
Database & ORM	PostgreSQL, MySQL, Prisma ORM, Redis Caching, SQLite / Room DB, Schema Migrations, Query Optimization
Cloud, DevOps & SRE	Docker, Linux VPS, CDN & Edge Caching, Git & GitHub Actions, AWS Basics, Google Cloud Platform (GCP), Vercel
AI & Automation	n8n (Self-Hosted & Cloud), AI Agent Workflows, LLM API Integration, Multi-Service Webhooks, Python Automation
Mobile & Systems	Android Native (Kotlin & Java), MVVM Architecture, Offline-First Sync, Hardware SDKs (RFID/Barcode)

PROFESSIONAL EXPERIENCE

Full-Stack Solutions Developer & IT Systems Officer • Kementerian Ketenagakerjaan RI (Kemnaker) May 2025 – Present
South Jakarta, Indonesia • Directorate of Binapenta & PKK

- Architected and deployed internal data platforms and automated REST API pipelines integrating multiple work units, eliminating communication bottlenecks across national employment programs.
- Spearheaded modern web dashboard development and n8n backend data synchronization pipelines connecting centralized PostgreSQL databases with regional work units.
- Enforced data integrity, enterprise security protocols, and comprehensive API documentation adhering to public-sector cybersecurity standards.
- Engineered automated data validation and aggregation workflows, reducing manual report compilation time by over 80%.

Remote Project Manager & Technical Consultant • PT Wahana Datarindo Sempurna June 2025 – Nov 2025
South Jakarta, Indonesia (Remote)

- Directed end-to-end engineering deliverables for distributed web & mobile systems using Agile/Scrum methodologies across remote multidisciplinary teams.
- Reviewed full-stack architectural proposals, API contracts, and database schemas to ensure sub-second response times and 100% milestone on-time delivery.
- Bridged technical requirements between corporate enterprise stakeholders, software engineers, and cloud infrastructure vendors.

Head of Software Department • PT Wahana Datarindo Sempurna June 2023 – June 2025
South Jakarta, Indonesia

- Led the software department in designing full-stack client-server architectures, Proof-of-Concept (PoC) platforms, and enterprise software solutions.
- Architected the backend and integration layers for 10+ major national-scale tender platforms, handling high-throughput sensor and inventory transaction data.
- Supervised code reviews, CI/CD deployment routines, and database schema migrations across relational database environments (PostgreSQL / MySQL).

Android Developer (WMS & RFID Hardware Integration) • PT Wahana Datarindo Sempurna

South Jakarta, Indonesia

July 2022 – June 2023

- Engineered native Android Warehouse Management System (WMS) client applications deployed on industrial rugged handheld devices across major enterprise logistics facilities.
- Integrated hardware vendor SDKs for UHF/HF RFID tag reading and laser barcode scanning, ensuring sub-50ms scanning response times in high-volume environments.
- Designed a resilient offline-first architecture utilizing Room Database (SQLite) and background synchronization via REST APIs, eliminating data loss during warehouse dead-zones.

Android Developer (Logistics & Digital Wallet) • PT Satria Antaran Prima Tbk. (SAP Express)

DKI Jakarta, Indonesia

Jan 2022 – June 2022

- Integrated native mobile clients with central backend payment gateways, dispatch APIs, and tracking microservices.
- Implemented cryptographic signature validation and secure session token handling for digital wallet transactions.

Web Developer (SIMRS) • Rumah Sakit Pamanukan Medical Center

Subang, West Java, Indonesia

Nov 2021 – Jan 2022

- Engineered core web modules for the Hospital Management Information System (SIMRS) using PHP (CodeIgniter 3) and MySQL, digitalizing healthcare workflows and patient administration.
- Developed responsive web interfaces and optimized relational database queries to accelerate medical record processing and patient data retrieval.
- Maintained stringent role-based data security and access controls in compliance with health information privacy standards.

Full-Stack & Web Developer • PT Spekta Cipta Interusa

Belitung / Remote, Indonesia

March 2020 – Oct 2021

- Developed custom web applications and content management platforms, fine-tuning server configurations and CDN edge caching for sub-second page loads.
- Engineered hardened user authentication, RBAC (role-based access control), and automated backup recovery pipelines.

IT Support & Network Technician (Internship) • Kantor Camat Tanjung Pandan

Belitung, Bangka Belitung, Indonesia

July 2015 – Sept 2015

- Designed and deployed local area network (LAN & Wi-Fi) infrastructure across office work units, establishing stable internet connectivity for sub-district government operations.
- Installed and configured network hardware including routers, access points, network switches, UTP cabling (crimping RJ45), and local IP address distribution.
- Provided front-line technical support, hardware troubleshooting (PCs, laptops, printers), and operating system maintenance for government personnel.

KEY FEATURED PROJECTS

Cloud Operations & High-Throughput Data Platform • Full-Stack Web & SaaS

Next.js 16 • TypeScript • React 19 • Prisma ORM • PostgreSQL • Tailwind CSS v4

Constructed a modern, type-safe management platform featuring server-side rendering (SSR), edge caching, and automated database migrations. Achieved sub-second query latency across complex relational data structures.

GovTech Enterprise Process Digitization & Data Pipeline • Data Engineering & API Integration

TypeScript • PostgreSQL • REST APIs • n8n • Python • Webhooks

Engineered end-to-end data synchronization pipelines and API connectors eliminating manual paperwork across government work units. Automated cross-directorate data validation and report aggregation.

Enterprise WMS Client-Server Architecture • Distributed Systems

Next.js • PostgreSQL • Android Kotlin • Room DB • RESTful APIs

Engineered an enterprise warehouse management system bridging handheld scanner clients with central databases via high-throughput REST APIs and offline-first caching.

EDUCATION

Bachelor of Informatics Engineering (S.Kom)

STMIK Nusa Mandiri, Jakarta

2017 – 2019

Associate of Computer Engineering (A.Md.Kom)

Universitas Bina Sarana Informatika (BSI), Jakarta

2013 – 2016

TARGET CERTIFICATIONS HIGHLIGHT

- Deploy Multi-Agent Architectures & ADK — Google (2026)
- Create Your First Gemini Enterprise Application — Google (2026)
- Belajar Membuat Back-End dengan Google Cloud & AWS — Dicoding (2026)
- Belajar Prinsip Pemrograman SOLID & Spec-Driven Development — Dicoding (2026)
- Cloud Practitioner Essentials (AWS) — AWS / Dicoding
- Oracle Java Programming & Java Fundamentals — Oracle Academy

- + 37 additional verified credentials in AI, Cloud, Mobile & Systems.
